HOME 2022/23

PURE NATURAL

Our mission is to leave as few imprints on the planet as possible, which is why we only use 100 % natural materials. We carefully follow each step our products take and look for the most climate smart way of working in our own OEKO-TEX® certified factory.

CAREFULLY SELECTED

We know what good quality should look like. Many aspects need to be taken into consideration such as thickness, length and whiteness of the fiber. Often, you have to blend different types of wool to reach the perfect result. To master this takes knowledge and persistence, something that we have acquired during our 140 years in the business.

SWEDISH WOOL

Our Swedish wool comes from many relatively small farms located in the southern parts of our country. It is sheared and sorted to suit our special needs. The wool is dense, warm and without any chemical treatment.

GOTLAND WOOL

The Gotland sheep is a Swedish breed, dating back to the Viking era. The wool is wonderfully airy, glossy and smooth with colors in different shades of natural grey.

LAMBSWOOL

Lambswool is from the first shearing of a sheep at around the age of seven months. Lambswool is softer and more elastic than adult wool.

RECYCLED WOOL

The recycled wool fibers come from our production process. It can be anything from wool from the carding machine to yarn threads from the loom.

As it is a mix of several different productions, the yarn acquires a wonderful and vibrant color variation.

MERINO WOOL

Merino is a famous traditional breed of sheep originally from Spain. It is considered to provide the thinnest, finest and softest sheep wool.

CASHMERE WOOL

Cashmere comes from a special goat and rearing takes place primarily in various parts of Asia. This is the most exclusive fiber of them all. It is strong and heat-insulating while being wonderfully soft and light.

ECO WOOL

The eco wool is tested by an independent laboratory and is guaranteed as free from pesticides.

RESPONSIBLE WOOL STANDARD (RWS)

This standard addresses the welfare of sheep and the land they graze on. The wool comes from certified farms that have a progressive and holistic approach to farming.

OEKO-TEX®

All products produced by our factory are OEKO-TEX® Standard 100 certified. This means that they are free from chemicals which are harmful to human beings. All parts of the product are thoroughly tested and the certificate is audited annually.

WOOLMARK®

Our wool products, except for the recycled ones, contain 100 % pure new wool of the highest quality and are thereby approved by Woolmark®.

A close-up, macro photograph of wool fibers. The fibers are light-colored, possibly off-white or light beige, and are shown in a dense, tangled arrangement. The lighting is soft and directional, highlighting the individual fibers and their natural texture. The background is dark and out of focus, making the wool fibers stand out prominently.

100 % BIODEGRADABLE

In contrast to synthetic fibers, wool is a natural and renewable resource. When wool is disposed of, it will decompose and release valuable nutrients back into the earth within a matter of months.

DINNER IS SERVED

Cooking for family and friends is a joy. With our kitchen textiles you can feel well dressed and greet your guests even with your apron on. Why not combine the apron with an oven glove or a kitchen towel in the same pattern.
